Sample only. Company names are masked; the full report shows the complete name and website for every row. Company-level data only: no personal names, emails or phone numbers. Built from licensed B2B firmographic and technographic data. Counts and growth figures come from the data provider and can change between runs.

Growth is the 1-year change in employee headcount as modelled by the data provider. Very high values (over 200%) often come from small headcounts and are checked by hand before they go into a paid issue.
